DETAILED ACTION

Specification Objection

1. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

2. As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

Art Unit: 2625

- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Aboutalib et al (U.S. Patent 5,867,587).

With regard to claim 6, Aboutalib et al discloses making initial estimates of the sub-spaces, i.e., eye, (see col. 4, lines 1-8), for example lighting, pose, identity and expression, i.e., drowsiness, using principle component analysis on appropriate groups of faces (see col. 4, lines 43-50), applying an iterative algorithm to image coding to maximize the probability of coding across these non-orthogonal sub-spaces (see col. 6, lines 19-33), obtaining the projection on each sub-space (which reads on pixel block association with the flagged element which is the eye location, see col. 6, lines 57-65), and recalculating the spaces (which reads on a separate threshold value is applied to surrounding pixel block averages, see col. 6, lines 57-col. 7, lines 1-6).

Allowable Subject Matter

4. Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance. The closest prior art of record failed to teach or suggest, comparing the overall approximated version of each image with the initial image to determine a error value for each image, sub-dividing the error value for each image onto a sub-error for each estimated property sub-space on proportion to the variance of that sub-space, and combining each sub-error for each image with the approximated version of that image on the estimated property sub-space to obtain a new approximated version on the property sub-space for each image, in combination with all the other limitations claims 1-5 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Prior Art Cited

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent No. (5,991,429) to Coffin et al discloses facial recognition system for security access and identification.

US Patent No. (6,332,033) to Qian discloses system for detecting skin-tone regions within an image.

US Patent No. (6,009,209) to Acker et al discloses automated removal or red eye effect from a digital image.

US Patent No. (5,774,576) to Cox et al discloses pattern recognition by unsupervised metric learning.
